

Victorian Default Offer 2023-24

Submission received via Engage Victoria on our consultation paper on Victorian Default Offer 2023-24

Date submitted: 9 December 2022

Submission prepared by: Ray Stephens

What are your views about our proposed approach to setting the 2023–24 Victorian Default Offer?

Set an inbuilt bias which motivates investors and prospectus away from fossil fuel and into renewable energy. If any of the EXXON et al affiliates think that have a right of complaint against prejudice then remend them if they had not lied to all of us for 50 years and handicapped our process to change away from black lung, child abuse, and suicidal future by arson, then such drastic decisions would not have been necessary

Do you think that the costs associated with the Australian Energy Market Operator's June 2022 interventions in the wholesale market should be reflected in the Victorian Default Offer? Why/Why not?

Yes

There will be a cost in turning all things gas or fossil fuel based into electricity derived from renewables and battery storage systems, but the long term benefits far outweigh the destruction of life paid in doing otherwise, whether we still live to see it or dies with remorse as it grows worse. The damage done by using children in coal mines as never been compensated and the price of remediation for global abuse for 500 years has not even been considered. This issue is huge as the mistakes writ in genocide and mass extinction and failure to respect the wisdom of the locals arrogantly inflicted with our diseases and our ignorance.

What are your views on using a variation mechanism for market intervention costs?

The more probably "green" is environmentally friendly before decomposing, the more the return of favourable result with ethic balanced to reward innovation and initiative, and motivation to cease paying arsonists to kill us all slowly with their greed.

Capitalism and Consumerism is a far bigger killer than population growth, because everyone cannot own a private golf course or 3vmitor vehicles and still breath fresh air and promote a healthy quality of life instead of servitude by a standard designed by slave traders and feudal

usurer cringe promoters of fluff and tinsel candy stores, with fear and dread on the opposite side of the legal tender.

Do you think we should make changes to our retail cost benchmarks? Why/Why not?

Yes

How far outside the envelope can we go before we become civilised enough to value sentience in other creatures than those we see in a mirror?

Do you think we should make changes to our customer acquisition and retention cost benchmark? Why/Why not?

No

Recognition of the difficulty to life animal consciousness up from gonads and stomach, it might not be possible to put wisdom and enlightenment on the market without being slapped across the face with wet soggy lettuce in a mouldy flood.

Do you think we should publish consultation papers in addition to our draft decision papers in future Victorian Default Offer reviews? Why/Why not?

Yes

You are going to need more staff.

Are there any other matters the commission should look into?

Yes, please explain why 1914 to 1918 only bought the Tsar to an end, and why if this even were sane and not a boon growth adaptation my duPont and Monsanto to sell chemical weapons on the open market and wipe out 69% of life from the mullusk and insects up, and then please explain why I'm off my bean whilst Donald Trump is courting Putin for 30 pieces of silver worth of all our flesh to a brothel. Sanity my kindred species throng, is the final frontier, whilst degrees of unsanity is all we have known so far.

We have a mind like quantum physics, we take advantage of having it but no idea how to use it.

No point my clinging to pricacy, whatever the rant and the judgement, because I am losing the liberty to breath, albeit slowly, and I may as well have my say while I still can. Entropy has me by the atrophy due to empathy refusing to become apathy, however much easier it be to sleep were this not so.

May judgement be righteous and fossilised sunshine stay million of years locked in the ground. We can't run it's machines except be getting run over by them like excess road pizza already is.
