

Minimum feed-in tariff review 2022-23

Submission received through Engage Victoria

Date submitted: 8 December 2021

Submission written by: Jorge Rosales

From 2 December 2021, we began accepting submissions on our Minimum feed-in tariff review 2022-23 via Engage Victoria (www.engage.vic.gov.au). On this website, people were given the opportunity to send us a response to a set of questions we provided.

Forecasting wholesale prices

It is always said to justify reductions on FIT or increase for consumers that wholesale prices are going down. The ESC is always favoring the power distributors and retailers ,AND WE ARE ALWAYS THE ONES WHO LOOSE

Other fees and charges

It is a rip off to pay 5.2 cents KW to solar power owners, when they charge 39 cents when we buy back the electricity. and I do not believe that the distributors expend 34 cents for kw to keep poles and lines
we were trick to expend money on solar power, and now you the ESC are benefiting the big guys, shame on you

Are there any other matters relevant to the review we should consider?

YES, protect the consumers against the greed of the distributors and retailers
