Subject gippsland water pricing

hi, i was wondering about the gippsland water price increases as they are extremely excessive and if it was not for expeniture on assets such as the water factory at maryvale which is not wanted or needed in our area (it could be in melbourne recycling their waste water for there use) any price rise would not be needed. I just wish I could go out and spend too much money then tell my boss he is covering my spending by giving me a extremely large pay rise. As a consumer with four children i find it hard to reduce water use as more people are always going to use more water. thanks and i look forward to hearing from you. Regards Brett Alston
