Dear Sir/Madam,

I am not able to access your draft decision as advertised but wish to point out that when we connected a 99 kW solar system on our farm approx. 18 months ago A.G.L. would not pay 8¢ as was the fee at that time but 1:1 on our purchase contract.

Our current contract to purchase has decreased whereas they are now offering 8¢ for the July 1 - Dec 30 solar contract. I suspect January 1st will see a drop below your price for feed in power.

Please place my objection to power companies being able to pay below the mandated price.

We use or could use all power produced
on our chicken farm except that half the
farm is either side of a public road.

Yours faithfully

John L. Scott

P.S.

About to leave for overseas for 5 weeks but
if you care to comment please contact my
electrician son at galluslave@bigpond.com.au
