Subject: Submission on review of Barwon Water prices

As a customer of Barwon Water, I would prefer that there be no price increases at this financially difficult time for so many.

Should the price rise be inevitable, I believe the price adjustment should begin from 1 July 2013, and it should be as low as possible.

I would strongly suggest that the tariff should apply to water only.

Since this review covers costs of the Melbourne to Geelong pipeline - which involves the transport of water only - not sewerage - there is no reason for sewerage costs to increase.
